We make the net work.

JXTA Extension: Configurator (aka ext:config)

- Update
  - Primary objectives have been achieved (ie consolidation)
  - Active adoption
  - Advnaced usage starting to occur (eg use of declaratives)
  - Tough issues have been in the areas of Win/* paths (impl detail)

JXTA Extension: Configurator (aka ext:config)

- Next
  - Optimized relay configuration
    - http:// platform.jxta.org/java/release/2004Q2_Jambalaya/ profiler.html
    - arcts.html
  - Consider clustering as defined in JDF
    - http:// jdf.jxta.org
    - Optional UI
